About the Forum

As a five-year initiative supported by the Global Environment Facility and led by the United Nations Environment Programme, UrbanShift aims to advance sustainable, integrated urban planning and development in over 23 cities across Asia, Africa and Latin America.

The UrbanShift Forums are the flagship events of this transformative initiative. Bringing together senior political and technical representatives from participating cities and countries, UrbanShift Forums provide a platform for knowledge exchange and collaboration on different urban challenges. At these Forums, cities enjoy the opportunity to expand their knowledge of regional urban challenges and replicable solutions, explore financing for projects, and boost climate commitments at local and national levels.

The UrbanShift Asia Forum will focus on the theme of Financing Climate Action in Cities. As cities across Asia face a range of challenges, from rapid urbanization to climate-related threats like flooding and extreme heat, advancing innovative, collaborative solutions are essential. This Forum will provide an opportunity for city and regional leaders to exchange insights about these challenges and identify replicable solutions, while also exploring opportunities for support from UrbanShift around knowledge enhancement, capacity building, financial assistance and engagement with the private sector.

The Forum will encompass multiple events and activities which will rest on three pillars:

- Advocacy and climate action
- Knowledge sharing and capacity building
- Finance and private sector engagement

Day 2, Tuesday, September 26, 2023

<p>09:00 – 09:40 Venue: Family Room</p>	<p>Joint Session of City Academies</p>
<p>09:40 – 16:00 Venue: Salon East</p>	<p>Parallel Session B1 - City Academy - Accessing Urban Climate Finance</p> <p>The goal of the course is to increase the capacity of city-level actors to mobilize and access climate finance for their net zero emission and climate resilient projects. Participants will have the opportunity to learn about the potential funding sources, financing instruments (traditional and innovative), as well as the advantages and disadvantages of each. Attending the course, city officials will also gain knowledge on project structuring and pitching to increase their chances to effectively connect to potential investors and financing institutions.</p>
<p>09:40 – 17:00 Venue: Family Room</p>	<p>Parallel Session B2 - City Academy - Accommodating Urban Growth</p> <p>The purpose of this module is to address the challenges of both urban growth and climate change and provide insight on how to design the cities of the future. Between 2020-2050, the urban population in the Global South is expected to increase from 3.4 to 5.5 billion in cities. This means that there is an ever-growing population that needs to be housed, have access to basic quality services and economic opportunities, enjoy a decent quality of life, and become resilient to climate change. The way we will accommodate this urban growth will have a significant impact on cities. The urban form adopted by a city now will lock it into either a productive, inclusive and sustainable future or one that is inefficient and energy-intensive, thereby compromising goals to limit greenhouse gas emissions.</p>
